**CAQI** [edit]

As of 2012, the EU-supported project *CiteairII* argued that the CAQI had been evaluated on a "large set" of data, and described the CAQI's motivation and definition. *CiteairII* stated that having an air quality index that would be easy to present to the general public was a major motivation, leaving aside the more complex question of a health-based index, which would require, for example, effects of combined levels of different pollutants. The main aim of the CAQI was to have an index that would encourage wide comparison across the EU, without replacing local indices. *CiteairII* stated that the "main goal of the CAQI is not to warn people for possible adverse health effects of poor air quality but to attract their attention to urban air pollution and its main source (traffic) and help them decrease their exposure."<sup>[33]</sup>

The CAQI is a number on a scale from 1 to 100, where a low value means good air quality and a high value means bad air quality. The index is defined in both hourly and daily versions, and separately near roads (a "roadside" or "traffic" index) or away from roads (a "background" index). As of 2012, the CAQI had two mandatory components for the roadside index, NO<sub>2</sub> and PM<sub>10</sub>, and three mandatory components for the background index, NO<sub>2</sub>, PM<sub>10</sub> and O<sub>3</sub>. It also included optional pollutants PM<sub>2.5</sub>, CO and SO<sub>2</sub>. A "sub-index" is calculated for each of the mandatory (and optional if available) components. The CAQI is defined as the sub-index that represents the worst quality among those components.<sup>[33]</sup>

Some of the key pollutant concentrations in µg/m<sup>3</sup> for the hourly background index, the corresponding sub-indices, and five CAQI ranges and verbal descriptions are as follows.<sup>[33]</sup>

Qualitative name	Index or sub-index	Pollutant (hourly) concentration in µg/m <sup>3</sup>			
		NO <sub>2</sub>	PM <sub>10</sub>	O <sub>3</sub>	PM <sub>2.5</sub> (optional)
Very low	0–25	0–50	0–25	0–60	0–15
Low	25–50	50–100	25–50	60–120	15–30
Medium	50–75	100–200	50–90	120–180	30–55
High	75–100	200–400	90–180	180–240	55–110
Very high	>100	>400	>180	>240	>110

Frequently updated CAQI values and maps are shown on the [www.airqualitynow.eu](http://www.airqualitynow.eu) and other websites.<sup>[32]</sup> A separate *Year Average Common Air Quality Index* (YACAQI) is also defined, in which different pollutant sub-indices are separately normalised to a value typically near unity. For example, the yearly averages of NO<sub>2</sub>, PM<sub>10</sub> and PM<sub>2.5</sub> are divided by 40 µg/m<sup>3</sup>, 40 µg/m<sup>3</sup> and 20 µg/m<sup>3</sup>, respectively. The overall background or traffic YACAQI for a city is the **arithmetic mean** of a defined subset of these sub-indices.<sup>[33]</sup>

**United States** [edit]

# https://getaircare.com

The screenshot shows a web browser window with the URL `getaircare.com/web/#draw?station=BorGradskipark&pollutant=AQI&country=rs&selectedStationType=1&language=sr`. The page features a map of the Balkan region with numerous colored dots representing air quality stations. On the right side, a red panel displays the following information:

- AirCare**
- rs Srbija - Srpski
- Station: Bor - Gradski park
- Pollutant: EU AQI
- 37** EU AQI
- Kvalitet vazduha je loš
- izmereno 2021-02-19 22:00
- Izvor podataka: Zvanične merne stanice
- Eliminiše sve zagađivače u zatvorenom prostoru

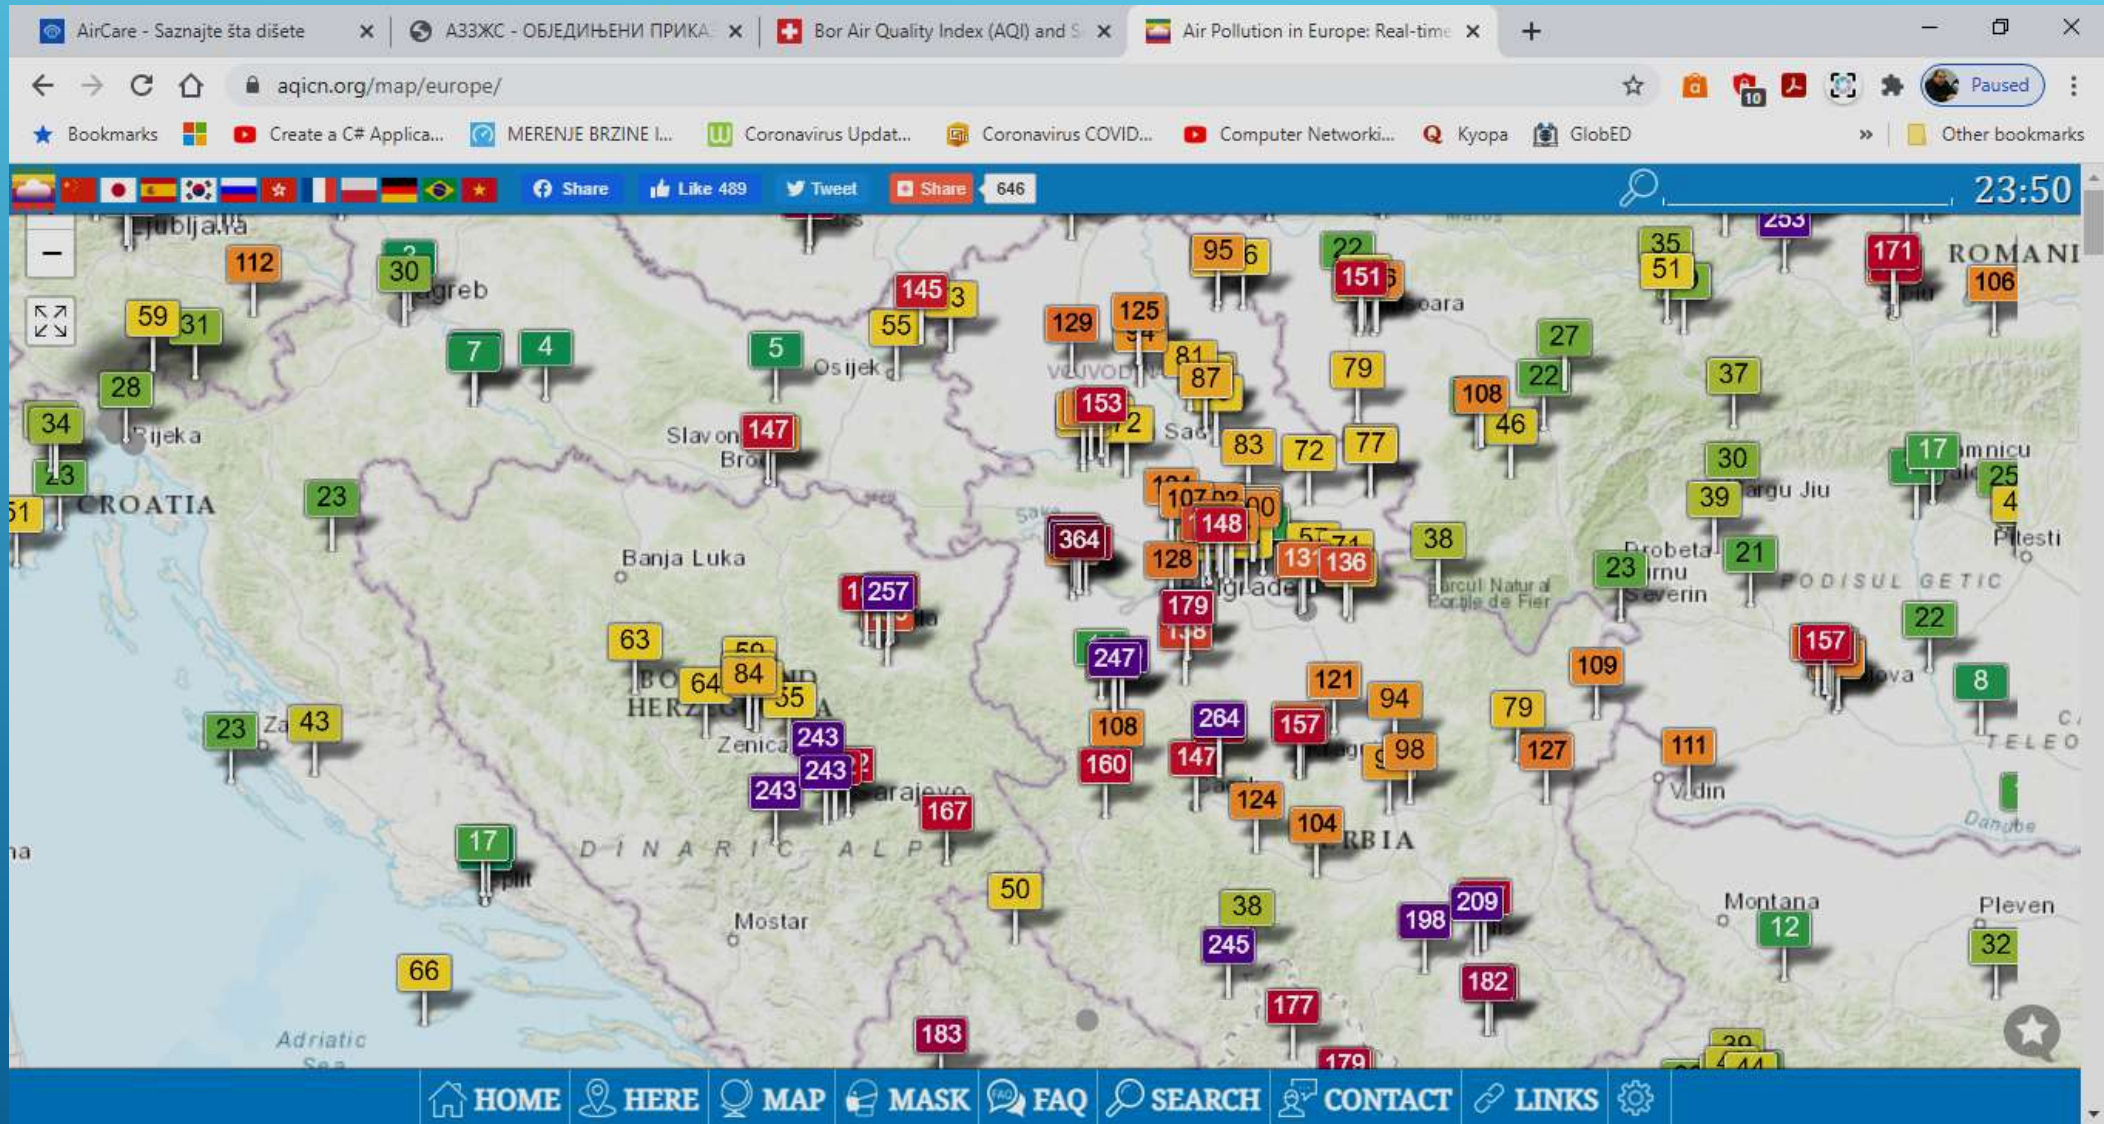

At the bottom of the red panel, there are two icons: a gear icon labeled "Leto" and a share icon labeled "Vidžet". The map on the left shows various cities and countries, including Croatia, Bosnia and Herzegovina, Montenegro, Serbia, Romania, and Bulgaria. The map is powered by Leaflet and OpenStreetMap contributors.

# https://www.iqair.com/

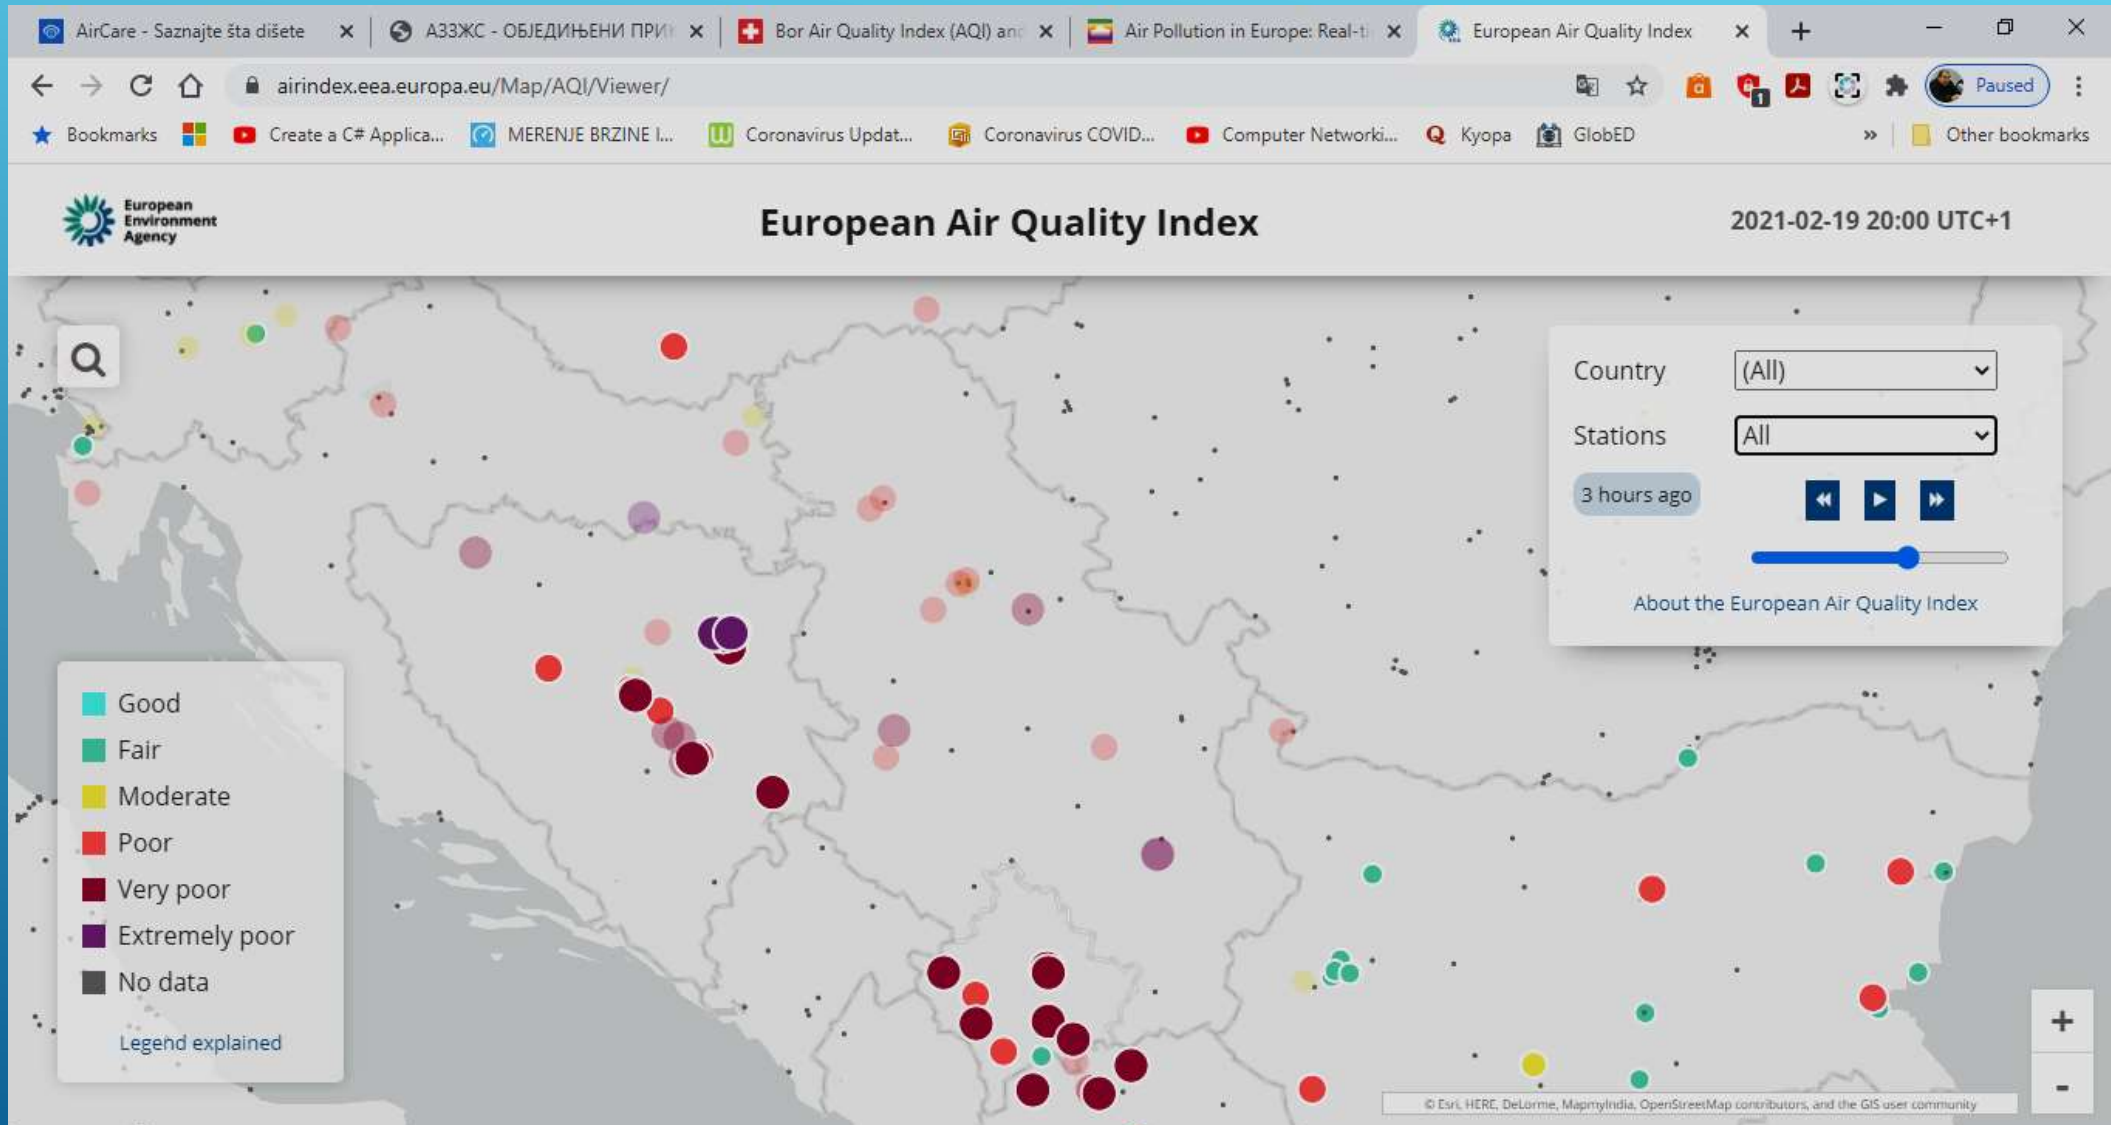

A screenshot of the IQAir website showing the air quality index for Bor, Serbia. The page features a navigation bar with the IQAir logo and links for World Air Quality, Community, At Home, At Work, News, and Support. The main heading is "Air quality in Bor" with a subtitle "Air quality index (AQI) and PM2.5 air pollution in Bor". A "LAST UPDATE" box shows "21:00, Feb 19 (local time)". A yellow banner displays the "US AQI" as 79 and the "LIVE AQI INDEX" as "Moderate", accompanied by a person icon. Below this is an "OVERVIEW" section with the question "What is the current air quality in Bor?". A table provides a summary of the air quality data.

Air pollution level	Air quality index	Main pollutant
Moderate	79 US AQI	PM2.5

# https://www.ventusky.com/

The screenshot shows the Ventusky website interface. At the top, there is a search bar with the text "Search for location..." and a location pin icon. To the right of the search bar are buttons for "App", "Share", "Settings", and "About". Below the search bar is a vertical menu of weather data layers: Temperature, Perceived temperature, Precipitation, Radar, Satellite, Clouds, Wind speed, Wind gusts, Air pressure, Thunderstorms, Humidity, Waves, Snow cover, and Air quality. The "Air quality" layer is currently selected. Below the menu, there are options for "Substance: PM2.5" and "Model: Automatic (SILAM)". The main part of the page is a map of Europe with a color-coded overlay representing air quality. A calendar overlay is visible on the right side of the map, showing the month of December for the year 1980. The calendar has a grid with days of the week (Mo, Tu, We, Th, Fr, Sa, Su) and dates (01, 02, 03, 04, 05, 06, 07, 08, 09, 10, 11, 12, 13, 14). The date 11 is highlighted in orange. A legend on the right side of the calendar shows a color scale for air quality in  $\mu\text{g}/\text{m}^3$ , ranging from 0 (blue) to 200 (black). The legend values are 0, 10, 20, 30, 40, 60, 80, 100, 160, and 200. At the bottom of the page, there is a timeline for "Today, 2021/02/24" with a play button, a "Previous" button, a "Change date" button, and a "Next" button. The timeline shows time slots from 1:00 AM to 10:00 PM.

### Trenutna situacija

The table below describes the current state of air quality in European cities:

- The general background air quality in the city. This is the outdoor air quality experienced by the average citizen.
- The roadside air quality. Generally the poorest air quality is found in busy streets. Citizens living, working and visiting these streets are all affected. This includes people in cars and busses.

Detailed information on the cities is available by clicking on their name.

The website's header includes the AirClim logo, the text "Air Pollution & Climate Secretariat", and navigation links for "The Secretariat", "Contact", and "Login". A search bar is also present. Below the header is a dark blue navigation bar with the following menu items: Home, AIR POLLUTION (highlighted), CLIMATE CHANGE, ACID NEWS, PUBLICATIONS, and EVENTS. The main content area features a large blue and white background image of a cloudy sky. On the left side, there is a vertical navigation menu with the text "Air pollution" and a home icon. The main heading "Air quality" is prominently displayed. Below the heading, there are three paragraphs of text. On the right side, there is a "Read more" section with a list of links, each preceded by a yellow arrow icon. The links are: Acidification, Eutrophication, Air quality (highlighted), What to do?, Policy initiatives, EU air pollution policy (with sub-links: The NEC directive, Air quality legislation, Industrial emissions, Legislation on vehicles and fuels), LRTAP Convention, Air pollution from ships, and Do your bit!

[Air pollution](#)

## Air quality

Air pollution affects us in many ways, perhaps more than we realize. Most important and obvious are the direct effects on human health. Recent research indicates that small particles (PM<sub>2.5</sub>) in the air caused nearly 400 000 premature deaths within the 28 EU countries in the year 2015. Another 16 000 premature deaths was caused by ground-level ozone, and exposure to nitrogen dioxide (NO<sub>2</sub>) caused around 76 000 premature deaths.

Small particles were also responsible for several hundreds of thousand serious hospital admissions in the EU28, and a much larger number of less serious effects, for example more than one million cases of bronchitis and 400-500 million restricted activity days.

But there are also other air pollutants and important indirect effects. This section (see menu in the left hand column) describes both the direct effects of different pollutants on health and vegetation, and some indirect effects, such as toxic groundwater and corrosion of materials, due to acidification.

# HTTPS://WWW.IQAIR.COM/SERBIA/CENTRAL-SERBIA/BOR

The screenshot shows the IQAir website interface for Bor, Serbia. The browser's address bar displays the URL: <https://www.iqair.com/serbia/central-serbia/bor>. The website header features the IQAir logo and navigation links: World Air Quality, Community, At Home, At Work, News, and Support. A search bar, a flag selector for Serbia, and a Login button are also present.

The main content area is divided into several sections:

- BOR AIR QUALITY MAP:** A dark-themed map showing real-time air pollution levels in Bor. A button labeled "EXPLORE MAP" is visible.
- OVERVIEW:** A section titled "What is the current air quality in Bor?" containing a summary table.
- AIR QUALITY CONTRIBUTORS SOURCES:** A section titled "Data provided by" showing 2 contributors and 2 data sources.
- Pollutants Table:** A table listing the concentration of various pollutants.
- HEALTH RECOMMENDATIONS:** A section titled "How to protect from air pollution in Bor?"

Air pollution level	Air quality index	Main pollutant
Moderate	79 US AQI	PM2.5

Pollutants	Concentration
PM2.5	25.6 $\mu\text{g}/\text{m}^3$
PM10	30.7 $\mu\text{g}/\text{m}^3$
SO2	14.6 $\mu\text{g}/\text{m}^3$

# HTTP://MIBOR.RS

The screenshot shows a web browser window with the URL [mibor.rs](http://mibor.rs). The browser's address bar shows "Not secure | mibor.rs". The website's header is green and features the logo of "Društvo mladih istraživača Bor" (Young Researchers Society Bor) on the left, which includes a red flower icon and the text "MLADI ISTRAŽIVAČI BORA". In the center of the header, it says "Četiri decenije radoznalosti, spoznaje i stvaralaštva" and "Društvo mladih istraživača Bor". On the right, there is a Facebook icon and a search bar. Below the header is a green navigation menu with the following items: MI BOR, NAJAVA DOGAĐAJA, PROGRAMI, JAVNE RASPRAVE, GALERIJE, STARI SAJT DMI, and KONTAKT. The main content area displays three images in a row: 1. A group of people gathered around a large, circular stone structure in a forest, with steam rising from the ground. 2. A group of people sitting in a room, listening to a presentation or lecture. 3. A group of people standing around a stone structure in a field, possibly an archaeological site. Below the first image is a text box with the following text: "Inicijativa za izradu Procene uticaja na životnu sredinu rudarskih objekata koji se grade za potrebe ventilacije rudnika Jama u Boru". Below the third image is a text box with the following text: "Programi" and "Javna politika i praksa zaštite vazduha".

## Саопштење за јавност

Због сумње да је дошло до загађења које може нарушити здравље људи и/или животну средину, Друштво младих истраживача из Бора је упутило Министарству животне средине захтев за наменским мерењем нивоа загађујућих материја у ваздуху у агломерацији Бор.

Захтев с односи на потребу мерења концентрација: сумпордиоксида, суспендованих честица (ПМ10, ПМ2,5), арсена, олова, кадмијума, живе и антимона.

**Погледајте/преузмите Захтев.**

## Health impact of ambient air pollution in Serbia: a call to action (2019)

**Download**

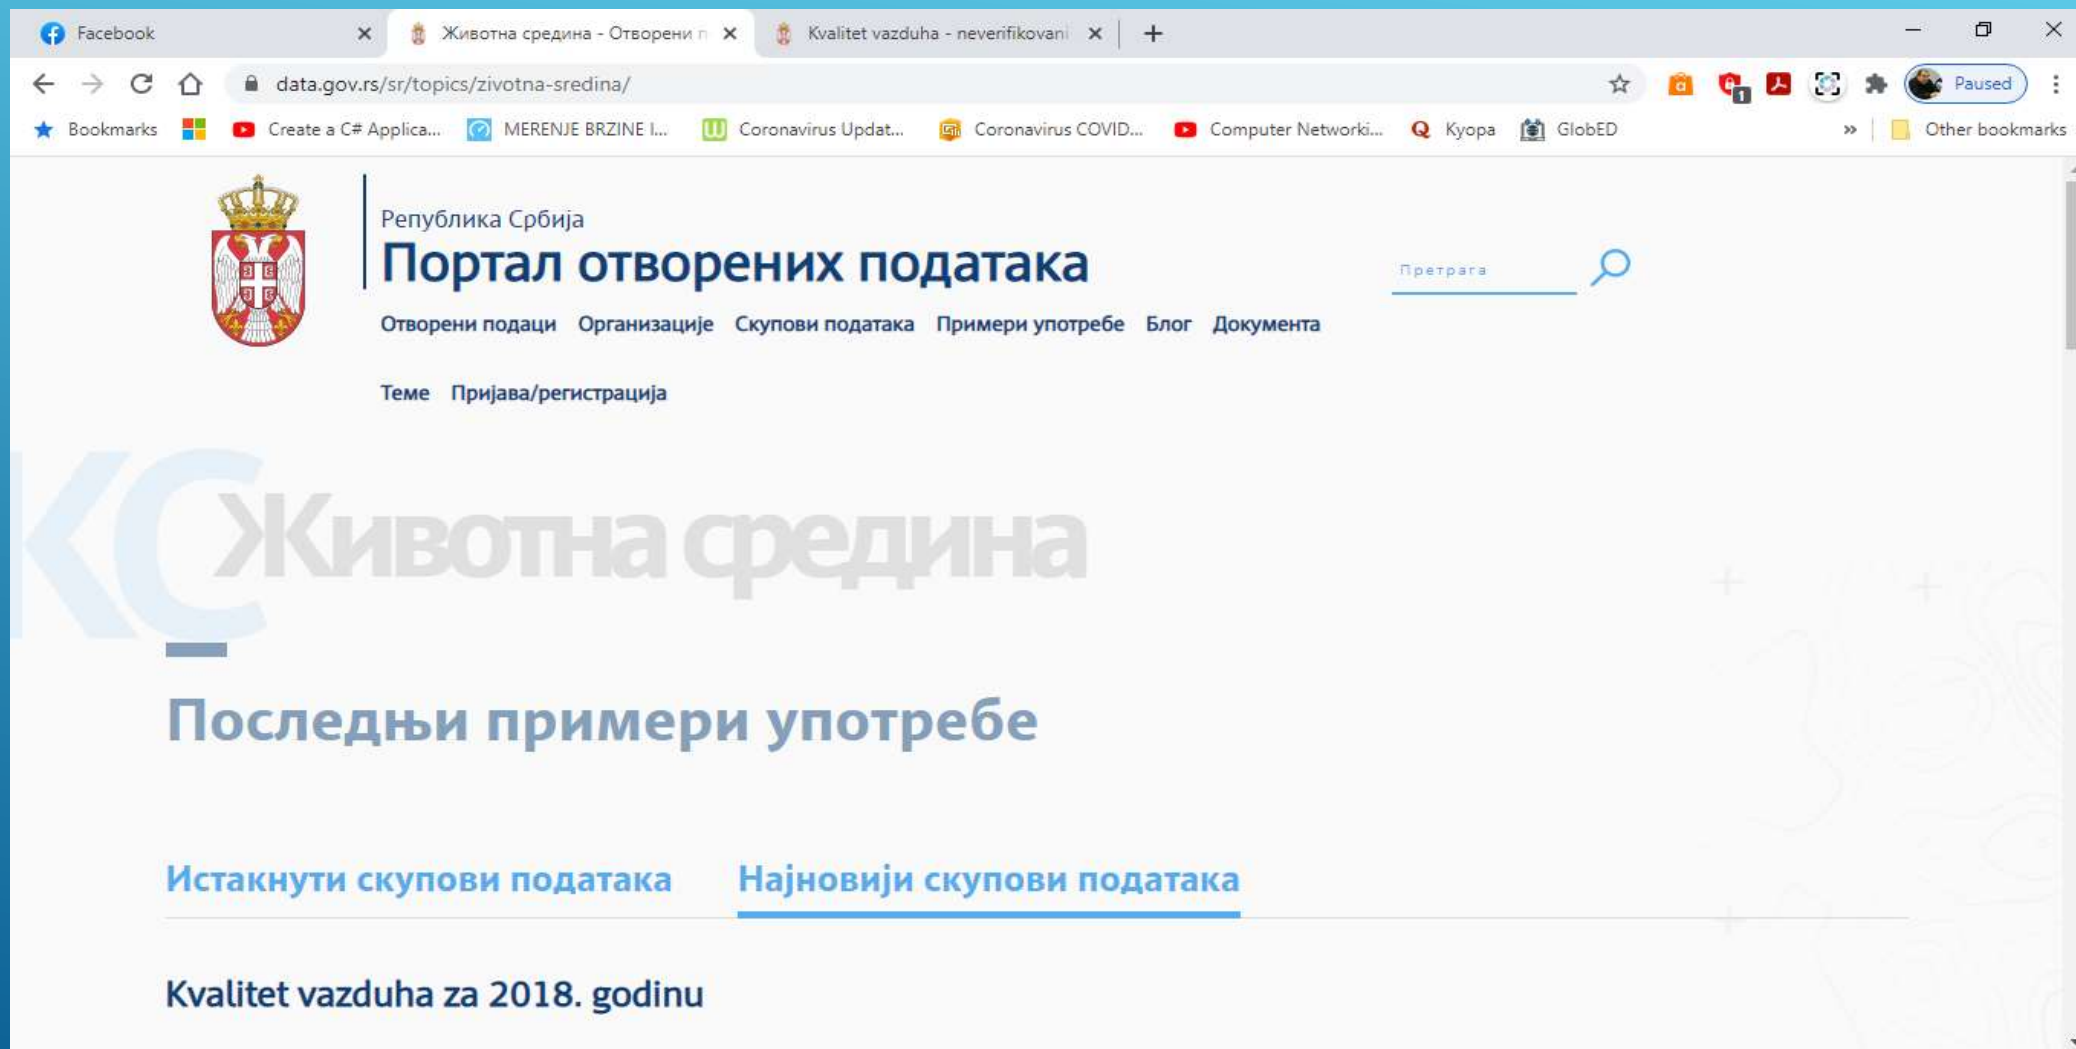

English (PDF, 1.8 MB)

This report, on a comprehensive investigation on the impact of air quality on health in Serbia, assesses the effects of air pollution on health in major cities. The results show that long-term exposure to air pollution leads to premature death for a relevant percentage of the population, and short-term exposure to air pollution increases mortality risk. The investigation collected data on air quality, the population and its health in 2010–2015. Levels of pollutants exceeding the values of the WHO air quality guidelines and the limits set by European Union legislation on air quality were recorded in several Serbian cities. The WHO AirQ+ software was used to calculate the proportion of deaths due to air pollution for the main Serbian cities. The analysis of the national data shows that nearly 3600 premature deaths every year are attributable to exposure to fine particulate matter measuring  $\leq 2.5 \mu\text{m}$  (PM<sub>2.5</sub>) in 11 studied cities in Serbia. Simulations of progressive reductions in current PM<sub>2.5</sub> concentrations point towards major health benefits from improving air quality in the country. The results of this analysis indicate the importance of a reliable monitoring of air quality and the need for interventions to reduce the burden of air pollution in Serbia.

# DATA.GOV.RS/SR/TOPICS/ZIVOTNA-SREDINA/

The screenshot shows a web browser window with the URL `data.gov.rs/sr/topics/zivotna-sredina/`. # ODBRANIMO REKE STARE PLANINE

The image shows a screenshot of a Facebook group page. At the top, the browser address bar shows the URL `facebook.com/groups/1925328764350247`. The Facebook navigation bar includes a search bar with the text "Претражите Фејсбук" and navigation icons for home, notifications (9+), and messages (4). The user profile "Mladen" is visible in the top right.

The main content area features a large banner image of a waterfall in a forest. Overlaid on the left side of the banner is a white logo consisting of three stylized mountain peaks. To the right of the logo, the text "ODBRANIMO REKE STARE PLANINE" is written in white, bold, uppercase letters. Below the banner, a green bar contains the text "Група странице Odbranimo reke Stare planine".

Below the banner, the group name "Odbranimo reke Stare planine" is displayed in bold black text. Underneath the name, it says "Јавна група · 128,4 хиљ. чланова". To the right of this text is a row of circular profile pictures of group members and a green button with a plus sign and the text "Позовите".

At the bottom of the page, there is a navigation menu with the following items: "Информације", "Дискусија" (highlighted with a blue underline), "Обавештења", "Собе", "Чланови", "Догађаји", and "Још". To the right of the menu are search and more options icons. At the very bottom, a "Create a public post" button is partially visible on the left, and an "Информације" button is on the right.

Inicijativa za izradu Procene uticaja na životnu sredinu rudarskih objekata koji se grade za potrebe ventilacije rudnika Jam u Boru

Nacrt zakona o rudarstvu treba da stvara i uslove za zaštitu životne sredine i održivi razvoj lokalne zajednice.

# OGRANIČENJA NA DRUŠTVENIM MREŽAMA

- ▶ Politika mreže domaćina
  - ▶ Politika grupe, stranice
  - ▶ Česte promene stavova i algoritama pojedinih mreža
- 
- A decorative graphic consisting of several parallel white lines of varying lengths, slanted diagonally from the bottom right towards the top right, set against the blue background.

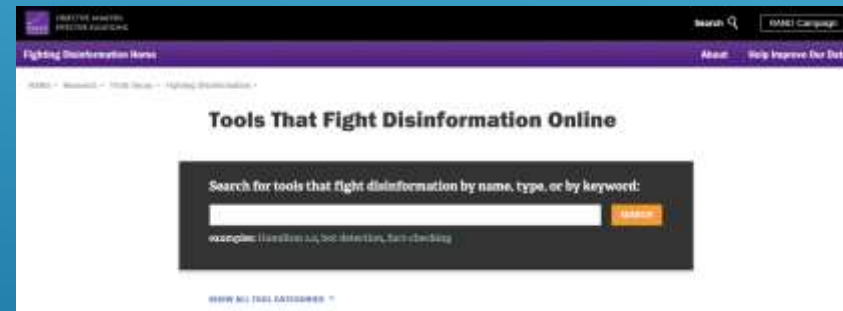

# INFORMACIJE I DEZINFORMACIJE NA DRUŠTVENIM MREŽAMA

- ▶ Namerno izmišljene priče plasirane kao da su novinarske, a cilj im je manipulacija čitalaca.
  - ▶ Dezinformacije (**Misinformation**) su lažne informacije koje se šire jer veruju da su istinite – **dobavljači**.
  - ▶ Dezinformacije (**Disinformation**) su lažne informacije koje se šire iako znaju da su lažne - pokušavaju da prevare ljude – **širitelji laži**.
- ▶ Cultura dijaloga
  - ▶ Cancel culture (kultura otkazivanja), Ciberbuling
- ▶ Učesnici rasprava:
  - ▶ Spameri, Hejteri, Trolovi, Clickbot

# POUZDANOST IZVORA INFORMACIJA

## Alati i metode za borbu protiv dezinformacija

PAŽLJIVO  
DA VAS NE  
BLOKIRAJU

Zelena Alijansa Srbije  
29 martiya · 🌐

I takooo...malo smo bilo blokirani i sprečeni da objavljujemo bilo šta jer smo se drznuli da objavimo ekocid u Boru a pomenuli i ko ga pravi pa su nas dušebrižnici prijavili.  
Inače, vrlo često objave ne izlaze, algoritmi ih odbijaju pa se pitamo šta se ovo desilo sa Facebook!?
